## Electrical Facilities Planning

The City of Bellevue has the authority to [regulate land use](#) and, under the Growth Management Act, the requirement to consider the location of existing and proposed utilities and potential utility corridors in land use planning. The city must also plan for the provision of essential public utilities such as [electrical facilities](#) consistent with the [goals and objectives of its Comprehensive Plan](#), taking into consideration the public service obligation of the utility involved.

Puget Sound Energy is underway with [Energize Eastside](#), an electrical facilities project to site and build approximately 18 miles of new 230-kilovolt transmission line from Redmond to Renton, through Bellevue.

The city is [engaged in the permit review](#) of PSE's proposed Energize Eastside project. In addition, the city is reviewing construction permits for the Council-approved [Lake Hills-Phantom Lake Transmission Line](#) project.

#TBT Look at the garish signs! And the phone booth! It's Northeast Eighth Street near 106th Avenue circa 1969. #ThrowbackThursday
